

Project Engineer

Seeking qualified and experienced engineers in these subject matter functional areas:

- Hydraulic modeling for pipelines and stormwater management. Experience with Bentley's WaterGEMS, SewerGEMS, and PondPack software packages desired.
- Transportation – Highways and Bridges.
- Building Structures.

In general, duties and responsibility include planning and design in a part of a major project or in a total project of moderate scope. Performs work which involves conventional engineering practice but may include a variety of complex features such as conflicting design requirements, unsuitability of conventional materials and difficult coordination requirements. Work requires a broad knowledge of precedents in the specialty area and a good knowledge of principles and practices of related specialties.

Requirements:

- BS Degree in civil engineering plus continuing education.
- PE License in District of Columbia and /or Maryland.
- Minimum 5 years' experience.
